

Year 12 3D Design OCR Cambridge Technical Level 3

You will be using a range of materials and techniques in Yr 13, so in order to prepare for that I will be asking you to watch these videos and create a step by step guide on how these techniques are carried out.

How I Make Silicone Molds | Seriously Creative

Seriously Creative Channel

<https://www.youtube.com/watch?v=jL7rq3UVQqw>

Resin Tutorial: How to mix resin the right way

Clever Girls Craft Channel

The first video is on making your own silicone mould. The second is for resin casting.

Your step by step guide will need to include a screen shot and written instructions. You will also need to include any health and safety measures and equipment that is needed.

In the new term, we will be using these techniques so this will help you prepare for the 3D work you will be doing next year.

Below is an example of a couple of pages from a step by step guide, this is what we are expecting to see.

This work will also be posted on google classroom along with the video links.
